COMPANY

Where we come from, who we are and what we do.

Headquartered in Braga and with more than 6 decades of experience in its field, O FELIZ - Metalomecânica is a company specialized in metallic construction, sheet profiling, cutting and bending of sheets, construction of lighting columns and communication towers, metalworking in stainless steel and laser cutting.

A policy of continuous investment in state of the art equipment and a focus on highly qualified and competent staff allows the company to maintain a production capacity and an immediate response to the market's demands and requests, making it a reference in its fields of action.

With a portfolio of well-known projects and clients, the company has the required knowledge and means to serve in the global market, with solutions starting at the conception and elaboration of the project, all the way to the construction and final assembly.

By focusing on the efficiency of the procedures and keeping a strong market orientation, the company has been able to establish itself in an extremely competitive market, conquering its customer's trust due to the quality of the final product and the ability to follow through within the deadlines.

With a growth strategy aimed at internationalization, O FELIZ - Metalomecânica exports to several countries and has an industrial unit in Angola which has production capacity and the ability to offer solutions for the market's needs and requests.

QUALITY

Quality policy.

Working in an extremely competitive market, where clients are more and more demanding, the Administration of O FELIZ believes that only with a real involvement, a strong market orientation, the optimization of all resources and a reduction of the activities which do not add value, as well as a strict compliance with the legal and statutory requirements applicable to the product, a sustained growth can be possible.

We are committed to this goal, believing that together we will improve the performance of our organization and we will stand as a reference company.

CE marking.

The CE marking exists to allow the free product circulation within the European Economic Space, while the voluntary markings aim at adding value and differentiating the products in their market.

The compliance with the CE marking is evaluated every year by the Certif association, through audits which are external to the product, throughout its entire production process.

Therefore, the European Commission considers the CE marking a "passport" which allows the free and legal circulation of merchandise within its borders, in accordance with their high quality and security standards, both for people and the environment.

REGULATORY ASPECTS

Legal framework.

The Public Lighting columns presented in this catalogue meet the requirements set by the standard EN 40 – Lighting Columns, and they are subject to the EC Conformity Verification, in accordance to the Directive 89/106/EEC – Construction Products.

The safety verifications for Ultimate Limit States and Serviceability Limit States were made following the EN 40-3-3:2003. For its dimensioning and the consequent setting of the service conditions, the following calculation bases were defined:

WIND ZONES

For the quantification of the wind action, we used the contents of the EN 1991-1-4:2005 Actions in Structures – Wind Actions. The base values for the wind's speed that we used were the following:

Zone	V_{ref}
A	28 m/s
B	31 m/s

Zone A: The entire Portuguese territory, except for Zone B;

Zone B: The Azores and Madeira and the regions of the mainland located in a coastal area of 5 km of width or with altitudes higher than 600 m.

PARTIAL SECURITY FACTORS

The partial security factors were defined according to section 5.4 of the EN 40-3-3:2003.

Class	TYPE OF ACTION	
	Wind	Permanents
A	1.4	1.2
B	1.2	1.2

MAXIMUM HORIZONTAL DEFLECTION

The maximum horizontal deflection on the top of the column was limited according to section 6.5.1 of the EN 40-3-3:2003.

Class	1	2	3
Maximum Horizontal Deflection	0,04 (h+w)	0,06 (h+w)	0,10 (h+w)

h – column's nominal height

w – bracket's horizontal projection

The service conditions tables were defined for a Class 3 maximum horizontal deflection. The exposure areas mentioned in the service conditions tables refer to a maximum area of wind exposure per lantern.

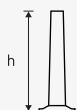

In order to verify the safety of the columns, we adopted a lantern with a characteristic mass of 25 kg.

NOTE:

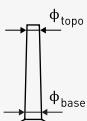

If you have any doubts about the conditions for applicability of a product mentioned in this catalog, please contact the Public Lighting Columns Department at O Feliz.

TECHNICAL SYMBOLS

Technical symbols used in this document.

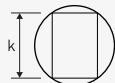

h – nominal height.

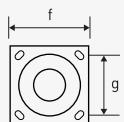

ϕ_{topo} - top diameter.
 ϕ_{base} - base diameter.

a - door opening height.
b - door opening width.

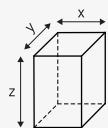

k - useable depth of the electrical compartment.

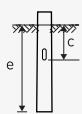

f - flange width.
g - distance between holes.

j - diameter of anchor bolt (metric dimension of the thread).
n - effective length of the anchor bolt.

x=y - width of the solid foundations.
z - depth of the solid foundations.

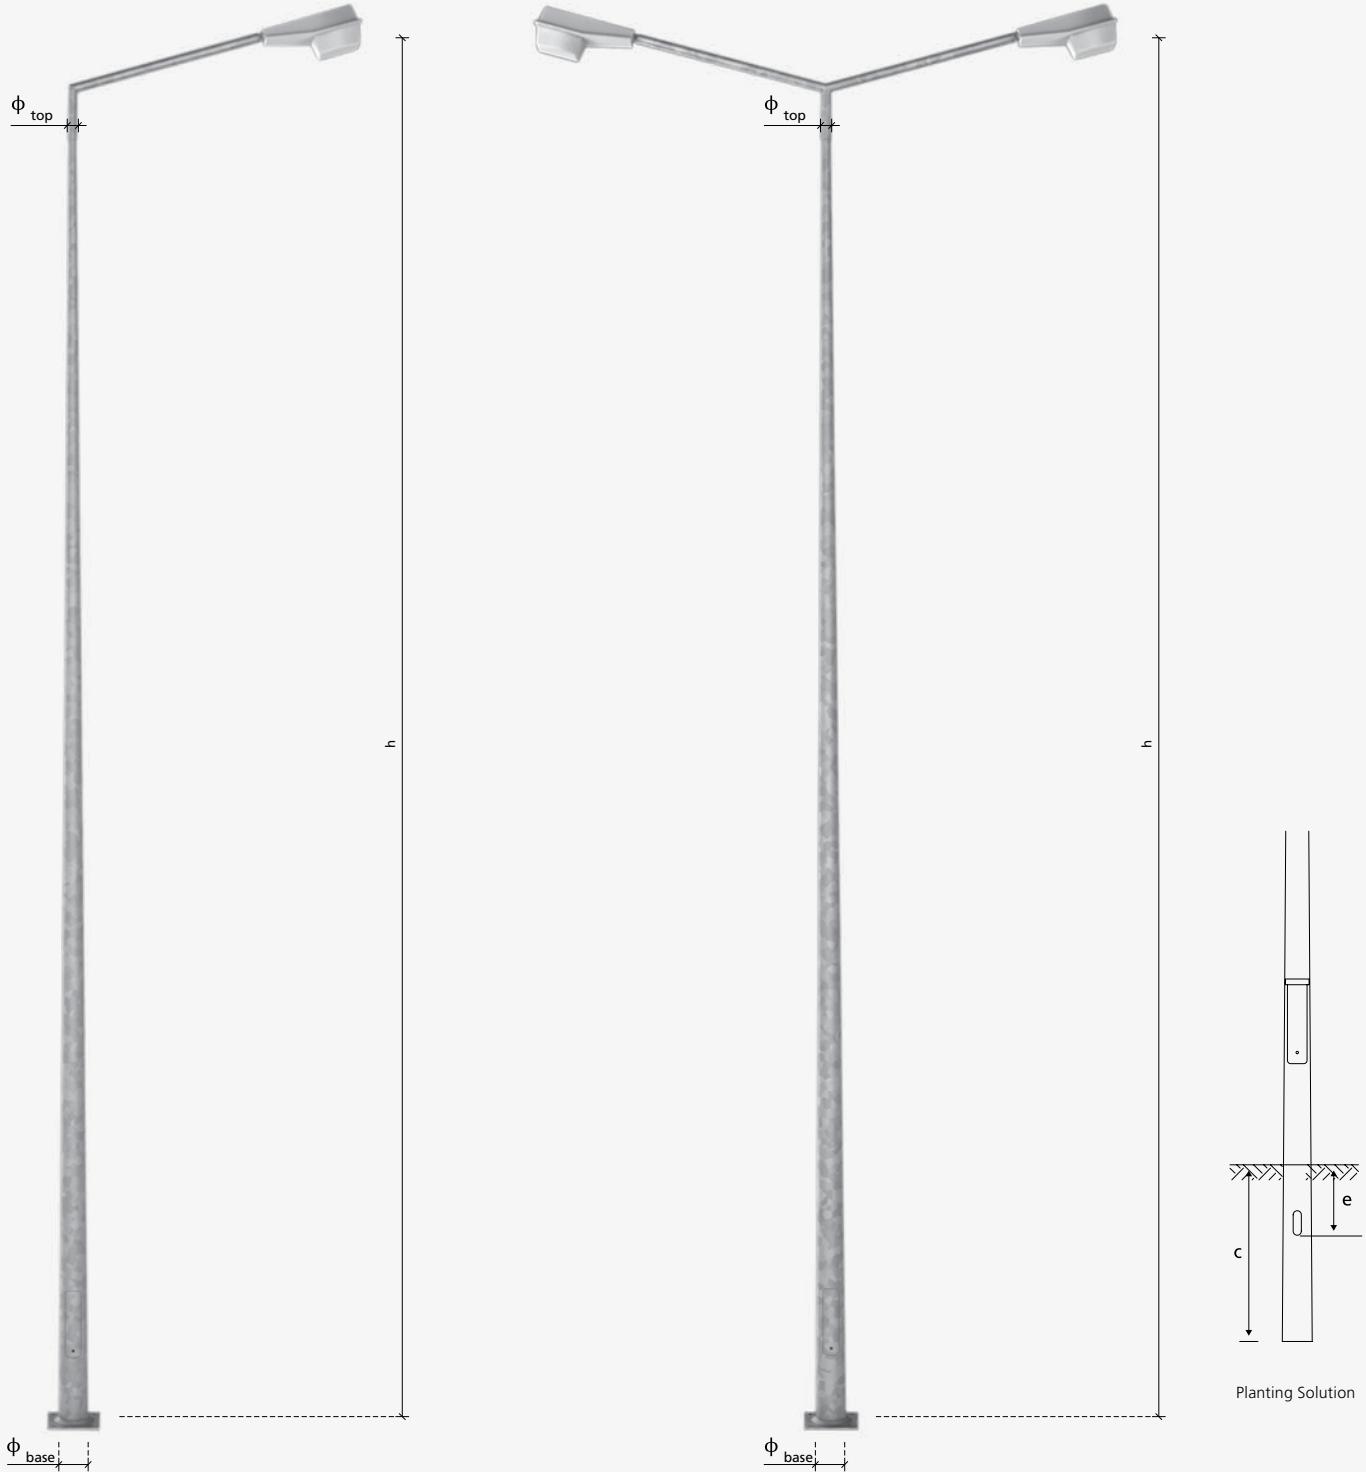

c - distance from the cable entry slot to the incorporation section.
e - planting depth.

TYPES OF COLUMNS

CONICAL COLUMNS

Single or double bracket. Setting by flange or planting.

FOUNDATION

The size of the foundation was defined for a ground with an admissible tension of 300 kPa. In its design, we considered Class C20/25 concrete and A400NR reinforcement steel frame.

ANTI-CORROSION PROTECTION

Hot dip galvanizing in accordance with the standard NP EN ISO 1461. The columns can be delivered with a different painting scheme.

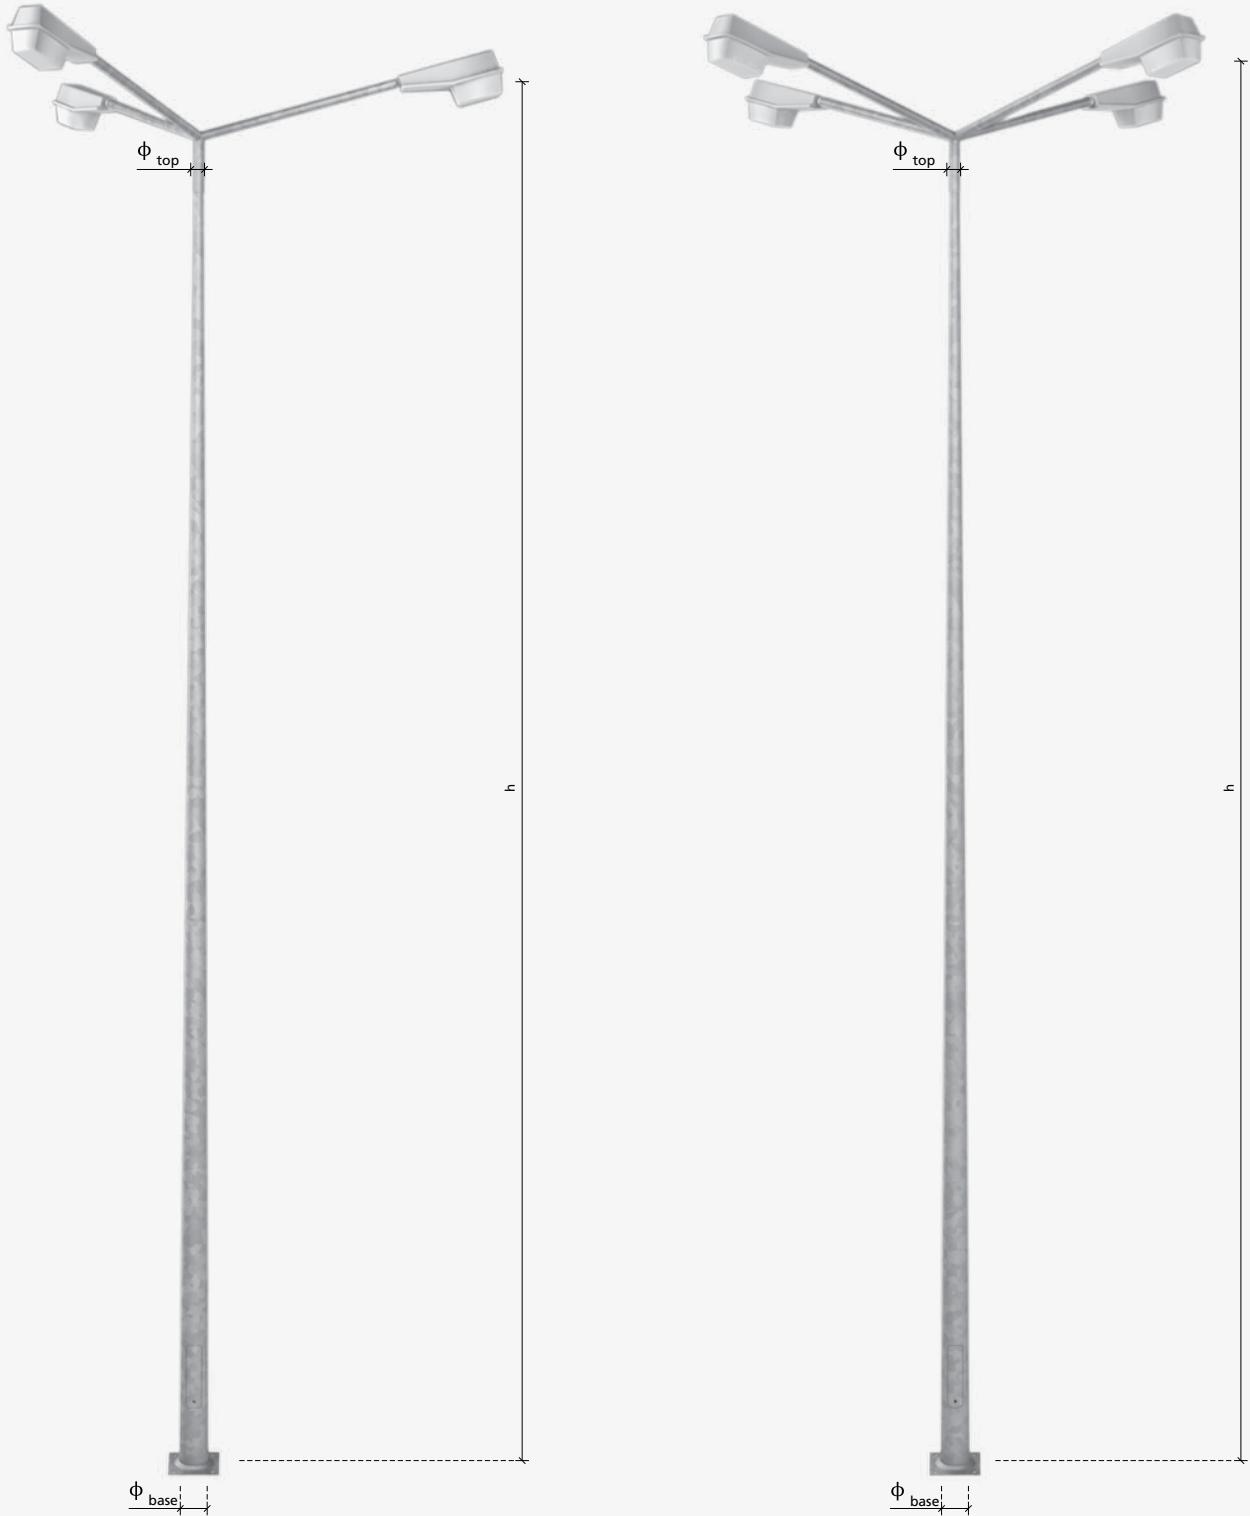

MATERIAL

S275JR steel in accordance with the standard EN 10025-2.

TYPES OF COLUMNS

CONICAL COLUMNS

Triple or quadruple bracket. Setting by flange or planting.

FOUNDATION

The size of the foundation was defined for a ground with an admissible tension of 300 kPa. In its design, we considered Class C20/25 concrete and A400NR reinforcement steel frame.

ANTI-CORROSION PROTECTION

Hot dip galvanizing in accordance with the standard NP EN ISO 1461. The columns can be delivered with a different painting scheme.

MATERIAL

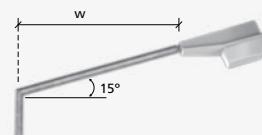

S275JR steel in accordance with the standard EN 10025-2.

BRACKETS

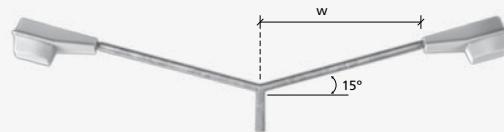

TYPES OF BRACKETS

Cylindrical geometry.

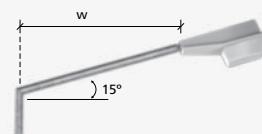

SINGLE BRACKET			
Reference	Description	Series	w [m]
CR302S	Single Cylindrical Bracket 0.50 m 15°	TC2	0.50
CR303S	Single Cylindrical Bracket 0.75 m 15°	TC2	0.75
CR304S	Single Cylindrical Bracket 1.00 m 15°	TC2	1.00
CR305S	Single Cylindrical Bracket 1.25 m 15°	TC2	1.25
CR306S	Single Cylindrical Bracket 1.50 m 15°	TC2	1.50

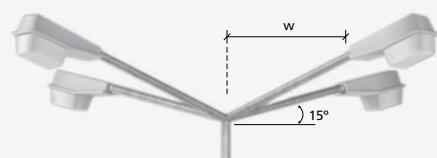

DOUBLE BRACKET			
Reference	Description	Series	w [m]
